

IAOCR

The International Accrediting
Organization for Clinical Research

Professional Recognition
4 Accredited Learning Credits
40 CPE Points

Internationally Qualified Clinical Research Professional

F-IAOCR Foundation Level

The GCP Accreditation and Foundations in Clinical Research Accreditation are the essential foundation stones for anyone already working in the clinical research industry, or looking to step into a clinical research career having already completed GCP and foundation level training.

Successfully obtaining both accreditations enables Clinical Research Professionals to enhance their career prospects and bolster their employability by evidencing to employers and the industry that they are independently competence verified and able to work to the global best-practice standards required by the industry.

Key benefits of IAOCR* Accreditation

- Advance your career and gain professional recognition by achieving an industry-leading internationally recognised accreditation
- Demonstrate your ability to work to global best-practice standards; IAOCR accredited professionals are respected and trusted in the global clinical research industry
- Earn Continuing Professional Education (CPE) points and learning credits to demonstrate your commitment to continuing professional development

*IAOCR works with the global clinical research community to develop core clinical research competencies which are then mapped to the International Standard Classification of Education framework developed by UNESCO.

“The ICH-GCP and Foundations in Clinical Research accreditations are well structured assessments which I would recommend to all staff working in clinical research, who want to demonstrate their understanding of research regulations and ICH-GCP scientific quality and ethical standards. The internationally recognised IAOCR accreditation was a big draw for me as it is highly advantageous in growing my clinical research career and growing research collaborations”

Saddaf Shaheen
Research Operations
Manager, Humber
Teaching NHS Trust

Achieve formal professional recognition and join the respected global community of IAOCR Internationally Accredited Clinical Research Professionals

Before enrolling for the F-IAOCR Clinical Research Professional Accreditation, you must first self-certify that you have gained the necessary experience (from previous training and/or on-the-job experience) to successfully complete the below competency assessment areas. Please note that this accreditation assessment does NOT include any training, it is designed to validate your competency against the core global competency frameworks developed in collaboration with the industry. The assessment areas are below:

Competency Assessment Areas for ICH-GCP

- International Conference of Harmonization – Good Clinical Practice (ICH-GCP) and the historical reasons for implementation
- The Declaration of Helsinki
- Protection of rights, safety and wellbeing of clinical trial participants
- Ethics committee/Institutional Review Board (IRB) roles in clinical trials
- Regulatory Authorities and their roles in clinical trial inspections
- Importance of data integrity and patient confidentiality in a clinical trial
- Experience and qualifications required by study staff in clinical trials
- Good Manufacturing Practice (GMP) in relation to the Investigational Medicinal Product (IMP)
- Randomisation and unblinding in a clinical trial

Competency Assessment Areas for Foundations in Clinical Research

- Key requirements in conducting clinical trials from start up to close out
- Clinical trial regulatory and ethical requirements
- Consent, reporting processes and maintenance of data integrity in clinical trials
- Clinical trial documentation
- Quality management processes and practices involved in clinical trials
- An understanding of the investigational medicinal product and its appropriate management
- Stakeholder management within a clinical trial
- An understanding of decentralized trials

Upon passing the accreditation assessments you will receive:

- Certificate of Accreditation
- Entitlement to use the designatory letters F-IAOCR Clinical Research Professional
- Electronic Professional Accreditation Marks for GCP, Foundations in Clinical Research and F-IAOCR Clinical Research Professional
- Unique Professional Registration Number
- 40 CPE Points and 4 accredited learning credits

IAOCR means... confidence in competence. Don't RISK your research.
